The Honorable Ted Stevens Chairman Committee on Appropriations United States Senate S-218, The Capitol Washington, DC 20510-6025

Dear Mr. Chairman:

Pursuant to 44 U.S.C. § 3544 (c), enclosed is the annual information technology security review for the U.S. Office of Government Ethics (OGE).

The Information Technology Group of the Bureau of Public Debt, Department of the Treasury, recently conducted a comprehensive Facilitated Information Technology Security Review (FITSR) of OGE's systems. The purpose of that independent review was to identify the risks and security weaknesses that we should consider in accrediting our General Support System and our Major Application.

Although no major problems were identified in the FITSR, a number of minor issues were brought to our attention. Accordingly, we developed a mitigation plan to address those weaknesses identified in the FITSR process. Our goal is to correct those deficiencies and achieve full certification and accreditation of our systems by December 5, 2003. Enclosed for your information are our Plans of Actions and Milestones for our information technology security program, as well as for our General Support System and Major Application.

The Honorable Ted Stevens Page 2

significant quantity of time and effort to design, configure, implement, and test a more secure OGE network architecture.

If you have any additional questions, please feel free to contact me or Daniel D. Dunning, Chief Information Officer, at 202-482-9203.

Sincerely,

Amy L. Comstock
