NAME Richard Baldauf	DESCRIPTION Meetings and Field Study with Chinese Ministry of Science and Technology; EPA's Office of Research and Development (ORD) and the China Ministry of Science and Technology (MOST) have signed a Memorandum of Understanding (MOU) to promote collaborations among EPA and Chinese researchers on projects of joint interest and concern. As part of this MOU, the two agencies have developed the Joint Workgroup on Environmental Research (JWGER) to implement seven research projects. One of these projects is the characterization of motor vehicle emissions and near-road air quality, including the development of innovative measurement methods. A pilot study was conducted in the Research Triangle Park, North Carolina area to develop and test method for chasing on-road vehicles with air quality sensors to identify motor vehicle emissions. A follow-up study is planned in China to use these same techniques to determine the feasibility and efficiency of using the method developed in the US on a large scale. The traveler will provide expertise and advise to the Chinese researchers on implementing the chase vehicle methods in China to the one used in the US. The EPA will also be shipping several air quality sensors to the Chinese researchers, so the traveler will advise the operation and use of this equipment during the study in China. The traveler will also participate in discussions and meetings with Chinese partners and other interested stakeholders to conduct the testing and data analysis as part of the collaborative research project and develop future collaborations. The traveler will also meet with US Embassy personnel to discuss potential applications of this project and other EPA research pertinent to the State Department. NAME Richard Baldauf	DESCRIPTION Advisory Board meeting for the Improving Smart Control of Air Pollution in Europe (ISCAPE) project: The ISCAPE Project entails the development and evaluation of passive air pollution control methods, including green and built infrastructure, to improve local air quality in urban areas. Dr. Baldauf's research at EPA has included the evaluation of how roadside vegetation, noise barriers and other infrastructure can be planned and built to provide strategies to improve local air quality. The ISCAPE researchers also plan to use the research and recommendations developed through Dr. Baldauf's work to implement passive air pollution control techniques in multiple cities in Europe. Dr. Baldauf, through his participation on the advisory board, will ensure that the ISCAPE project team implements their designs and construction of passive methods following the latest research and recommendations developed by the EPA. 	DESCRIPTION/SPONSOR/DATES		SOURCE	DESCRIPTION	CHECK	IN-KIND	AMOUNT
NAME Robert Burgess	DESCRIPTION Dr. Burgess will serve as a member of the Stakeholder Board of the European Union funded SOLUTIONS project for the 4th General Assembly. In this role, he will provide constructive comments on how the project is functioning and give an outsider's perspective on the project's development and progress. The Stakeholder Board is constituted of experts from around the world who are interested in the results of the SOLUTIONS project in terms of the scientific and technological findings. The invitation e-mail and a draft agenda are attached. Further, this travel will serve as an opportunity for Dr. Burgess to meet with scientists from around Europe, China, Australia and Brazil, all with a specific interest in understanding how to identify contaminants that are adversely affecting the ecological and human health and sustainability of natural waters. This travel advances U.S. EPA's Office of International and Tribal Affairs (OITA) International Priorities in the following areas: (1) Expanding Access to Clean Water, (2) Reducing Exposure to Toxic Chemicals, and (3) Building Strong Environmental Institutions and Legal Structures. Further, without this mission critical travel, key ORD deliverables to the Program Offices (e.g., OSWER, OW, OCSPP) under ORD's research planning process could be delayed. The travel also contributes to U.S. foreign policy objectives with Europe, a region considered a key strategic partner under the IMPLEMENTING ARRANGEMENT between the European Commission and the U.S. EPA to Promote Cooperation on Environmental Research and Ecoinformatics as	LOCATION Wageningen, The Netherlands	UFZ Helmholtz Centre for Environmental Research GmbH	Common carrier transportation	X		\$1450
				Meals	X	X	\$250
				Lodging	X		\$650
				Local transportation	X		\$125

specifically described in the 2007 Science and Technology Agreement managed by the Department of State. Further, the travel contributes directly to achieving key accomplishments in a program (i.e., the SOLUTIONS project) which depends on critical U.S. EPA participation in an advisory role. Specifically, the travel is being performed in order for European and U.S. EPA scientists to gain a better understanding of which emerging contaminants represent the greatest environmental risks in the aquatic environment.

The SOLUTIONS project brings together experts from Europe, South America, China and Australia and North America to discuss methods for monitoring the presence of and determining the environmental behavior and toxicological effects of conventional and emerging chemicals entering aquatic systems. Many of the emerging contaminants under consideration are of direct interest to the objectives of the U.S. EPA's ORD Safe and Sustainable Water Resources (SSWR) research program. Since the late 1990s, the presence of emerging contaminants in the waters of the United States has been recognized as a source of risk to human and ecological health as well as a source of uncertainty to the continued sustainability of these waters. Topics covered in this meeting are most relevant to the following components of the current SSWR research program: 3.02 Science to Support New or Revised Water Quality Criteria to Protect Human Health and Aquatic Life; Task 3.02C Development of innovative advanced tools and technologies to identify and quantify exposure to and/or effects of chemical and microbial contaminants including those of emerging concern for future human health and aquatic life criteria.

Most of the travel costs are being paid for by the Germany for profit research facility, the UFZ Helmholtz Centre for Environmental Research GmbH (a member of the SOLUTIONS research team). This funding is from a European Union research grant. Specifically, flights, lodging, local transportation, and most meals will be paid for by SOLUTIONS funding via the UFZ Helmholtz Centre for Environmental Research GmbH. Cost to AED are estimated to be approximately \$350.00.

"In cash" reimbursement (see below) will involve Dr. Burgess providing a contact person in the U.S. EPA travel office with Dr. David López Herráez' (UFZ Helmholtz Centre for Environmental Research GmbH) contact information. After the travel has occurred, Dr. Herráez will be requested by the travel office to transfer the reimbursement directly to the Agency travel account. Dr. Burgess will have already been reimbursed by the Agency's for his travel costs.

NAME Steve Fries	DESCRIPTION The National Adaptation Forum is the gathering of the adaptation minded. Since the Forum is created by and for the members of the adaptation community, the meeting focuses on issues of the day. Our session will communicate the real-world challenges and accomplishments of water sector utilities that have used CRWU tools and other resources to adapt to the impacts of climate change, as well as the value of peer-to-peer information sharing. The panelists will discuss the diverse challenges that utilities, regional organizations, and community leaders face in managing their response to climate change, including regional variations in climate hazards and projections, financial and technical resource constraints, and community support. NAME Elaine Hubal	DESCRIPTION To Nano or Not to Nano: That is the Question. The dream of nanotechnology was and is to provide materials with novel, previously unattainable properties with some net societal and economic benefit. Nano-enabled products are emerging in many commercial sectors, yet little is known about how their performance, cost, and environmental benefits/costs compare to existing market solutions. In this session, we compare the benefits and impacts for nano-enabled versus traditional materials through integrative, life-cycle approaches and address design rules to enhance benefit. NAME Kristin Leefers	DESCRIPTION At the invitation of the Washington State Dept. of Ecology (WDOE), EPA will conduct the 6th in a multi-session training event for estuary monitoring. EPA will instruct WDOE staff in the logistics of sample collection for estuary monitoring for implementation of the Clean Water Act. WDOE staff involved in previous trainings have left the agency, and they are requesting that the EPA Dive Team train their new employees in sample collection and marine monitoring which is a fundamental activity supporting the missions of both EPA and WDOE. EPA staff (3 with 1 alternate trainer) will travel to Tokeland, WA, to provide hands-on training at this site known for its high currents and challenging logistics. 	DESCRIPTION/SPONSOR/DATES		SOURCE	DESCRIPTION	CHECK	IN-KIND	AMOUNT
NAME Paul Machiele	DESCRIPTION Individual speakers and panelists will look at some of the most salient questions and challenges for the future and comment on the major mileposts ahead. They'll look at the critical dates that will be approached this decade as well as in the 2020's. We'll hear what the North American fuel landscape might look like in various five year intervals between now and then, and how Washington, Houston, and the Midwestern agricultural venues may fare. Paul Machiele, Director Fuels Program, U.S. Environmental Protection Agency will look at how changes in existing and new technologies may or may not happen as the U.S. approaches the deadline for more miserly MPG numbers. NAME Teresa Norberg-King	DESCRIPTION Workshop on "Establishment of the Eco-TTC	LOCATION CANADA - OTTAWA	ILSI HEALTH AND ENVIRONMENTAL SCIENCES INSTITUTE (HESI) NON-PROFIT	Common carrier transportation Meals		X X	\$1000 \$290

	Approach for Environmental Risk Assessment of Chemicals: The primary objective of this workshop will be to discuss and evaluate the feasibility of a novel "eco-TTC" approach for environmental risk assessment. The Threshold of Toxicological Concern, or TTC concept, is well-established risk assessment tool for determining a human exposure concentration with negligible risk in the absence of chemical-specific data. This approach was initially developed for assessing human safety of indirect food-contact substances and has been reapplied for a variety of endpoints including carcinogenicity, teratogenicity, and reproductive toxicity. Recently, we have proposed an extension to the human safety TTC concept for application in environmental situations, termed the ecological TTC or "eco-TTC".		503(C)	Lodging		X	\$465

NAME Jayshika Ramrakha	DESCRIPTION To educate stormwater practioners in stormwater regulations and management strategies. This conference promotes permitted stormwater topics. These topics include themes associated with the stormwater permitting program, non point source pollution program, water quality and various innovative research. This event provides a forum where stormwater professionals can interact with each other and learn about new and innovative ways in which stormwater can be managed, EPA's requirements and how to meet permitting standards. This event helps promote EPAs mission of protecting the environment and human health by giving stormwater professionals more information on how to meet EPA regulations, water quality standards and use best management practices. NAME Blake Schaeffer	DESCRIPTION Association of Environmental and Resource Economists signature Summer Conference gathers	LOCATION Pittsburgh, PA	Association of Environmental and Resource Economists	Common carrier transportation	X		\$312
				Meals	X		\$162

	the world's leading environmental and natural resource economists for learning and exchanging ideas. Dr. Schaeffer will provide a oral presentation focused on new opportunities for environmental measures that can be incorporated into economic models. Assessing environmental outcomes has historically required in-situ measurement. Exciting new technologies and methods – most notably in the area of remote sensing – are now providing alternatives that can greatly expand the spatial and temporal extent of available data. Environmental economists have begun exploring how high resolution remote sensing data for air pollution, water pollution, land use, marine resources, and other margins (including in some cases behavioral outcomes) can be leveraged for economic modeling. The workshop will include lectures from technical experts at NASA and EPA on current and future capabilities and limitations, practical input on accessing and using data, and case studies demonstrating successful implementation in economic studies.		Lodging	X	\$294.12

NAME Jon Sobus	DESCRIPTION The Scientific Guidance Panel, a panel of expert scientists from outside of state government, plays a major role in the California Environmental Contaminant Biomonitoring Program (also known as Biomonitoring California). The role of the Panel is to: 1. Make recommendations regarding the program's design and implementation. This includes making specific recommendations regarding chemicals that are priorities for biomonitoring in California. 2. Provide scientific peer review for Biomonitoring California. I have been asked to attend and present at this SGP meeting to communicate EPA/ORD's latest research on non-targeted analysis methods.	LOCATION California Department of Public Health, Richmond Campus, Richmond, CA	California Environmental Protection Agency (CalEPA) Office of Environmental Health Hazard Assessment	Common carrier transportation Meals Lodging Local transportation Other: RDU parking (\$14/day)	X X X X	X	\$735.66 \$224 \$597.75 \$60.19 \$56

NAME Dan Villeneuve	DESCRIPTION Meeting 1: Contribute as an expert to delivering the second of three training courses organized by JRC's Directorate F - Health, Consumers and Reference Materials, Chemical Safety and Alternative Methods Unit for the European Food Safety Authority (EFSA) on Adverse Outcome Pathways, during 2017. The two-day training course will take place at the premises of EFSA in Parma, Italy on the 12th June 2017 until the 13th June 2017. The Chemical Safety and Alternative Methods Unit is strongly committed to the development of AOPs and the dissemination and uptake of the concept, including the development of training materials. EFSA via a Service Level Agreement has requested that JRC provide eight training courses, each of 2 days duration, to EFSA over 2.5 years. Owing to your specific expertise in the development of AOPs as well as in your specific expeerience in training others on AOP concepts and best practices in this rapidly moving arena, we would highly value your input as a member of the training team in order to be	LOCATION FRANCE - PARIS; FRANCE - PARMA; FRANCE - PARIS	EUROPEAN COMMISSION - DIRECTORATE-GENERAL JOINT RESEARCH CENTRE	Common carrier transportation Meals Lodging Other: Train fare, local transit. NAME Tim Wade	DESCRIPTION This SEJ project aims to inform updated estimates of the incidence of all domestically acquired illnesses, laboratory-confirmed or not, caused by foodborne and waterborne pathogens in the United States. Because most food- and waterborne pathogens can be transmitted through several pathways, incidence estimates are based in part on estimates of the relative contribution of major modes of transmission (e.g., food, water, person-to-person, animal contact), but evidence to inform estimates of transmission modes from other studies is incomplete. This study will form a key basis for understating and estimating the modes of transmission associated with food- and waterborne pathogens, improve the prevention of these diseases, and guide policy decisions.
