NAME Melanie Adams	DESCRIPTION Vienna Biocides Conference - 18th Annual Melanie will be presenting EPA's Safer Choice program and give a perspective on safer biocides. In addition to presenting, Melanie will attend the conference and participate in the workshops. Chemical preservatives (and closely related antimicrobial actives) are an important evolving topic in the chemical use arena. Safer Choice is seeing possible gaps in chemical management coverage for some types of preservative-containing products/formulations - some manufacturers are suggesting that SCIL chemicals - which are safer, but certainly not safe - may not meet all needs (fungicide vs. biocide) for all product types. Also, journal articles have	LOCATION AUSTRIA - VIENNA	Chemical Watch	Common carrier transportation		X	\$1500
				Lodging		X	\$270

	<p>recently highlighted "sensitization" concerns for some widely used chemicals allowed under Safer Choice. Additionally, Walmart and Target are encouraging industry to find safer alternatives in this area. Also, the EU is considering restrictions for some biocides.</p> <p>Presentations at the conference would help us understand developments at international regulatory bodies (Europe, Japan, China, New Zealand, and others), the chemical supply chain, and the NGO community. What Melanie learns could help inform our work on the pesticides pilot and the preservatives we allow in our labeled products. It will also allow for other regulators of chemical risk to understand US directions and priorities in the area.</p> <p>The purpose of this event is closely related to two Agency Priorities – Taking Action on Toxics and Chemical Safety. And Working Toward a Sustainable Future.</p>

Robert Burgess	Dr. Burgess will serve as a member of the Stakeholder Board of the European Union funded SOLUTIONS project for the 2nd General Assembly. In this role, he will provide constructive comments on how the project is functioning and give an outsider's perspective on the project's development and progress. The Stakeholder Board is constituted of experts from around the world who are interested in the results of the SOLUTIONS project in terms of the scientific and technological findings. The invitation e-mail and meeting itinerary are attached. Further, this travel will serve as an opportunity for Dr. Burgess to meet with scientists from around Europe, China, Australia and Brazil, all with a specific interest in understanding how to identify contaminants that are adversely affecting the ecological and human health and sustainability of natural waters. This travel advances U.S. EPA's Office of International and Tribal Affairs (OITA) International Priorities in the following areas: (1) Expanding Access to Clean Water, (2) Reducing Exposure to Toxic Chemicals, and (3) Building Strong Environmental Institutions and Legal Structures. Further, without this mission critical travel, key ORD deliverables to the Program Offices (e.g., OSWER, OW, OCSPP) under ORD's research planning process could be delayed. The travel also contributes to U.S. foreign policy objectives with Europe, a region considered a key strategic partner under the IMPLEMENTING ARRANGEMENT between the European Commission and the U.S. EPA to Promote Cooperation on Environmental Research and Ecoinformatics as specifically described in the 2007 Science and Technology Agreement managed by the Department of State. Further, the travel contributes directly to achieving key accomplishments in a program (i.e., the SOLUTIONS project) which depends on critical U.S. EPA participation in an advisory role. Specifically, the travel is being performed in order for European and U.S. EPA scientists to gain a	SWEDEN - STOCKHOLM	Environmental Research GmbH	Meals	X		\$213.33
				Lodging	X		\$1288.92
				Local transportation	X		\$128.63

better understanding of which emerging contaminants represent the greatest environmental risks in the aquatic environment.

The SOLUTIONS project brings together experts from Europe, South America, China and Australia and North America to discuss methods for monitoring the presence of and determining the environmental behavior and toxicological effects of conventional and emerging chemicals entering aquatic systems. Many of the emerging contaminants under consideration are of direct interest to the objectives of the U.S. EPA's ORD Safe and Sustainable Water Resources (SSWR) research program. Since the late 1990s, the presence of emerging contaminants in the waters of the United States has been recognized as a source of risk to human and ecological health as well as a source of uncertainty to the continued sustainability of these waters. Topics covered in this meeting are most relevant to the following components of the current SSWR research program: 3.02 Science to Support New or Revised Water Quality Criteria to Protect Human Health and Aquatic Life; Task 3.02C Development of innovative advanced tools and technologies to identify and quantify exposure to and/or effects of chemical and microbial contaminants including those of emerging concern for future human health and aquatic life criteria.

Most of the travel costs are being paid for by the Germany government's research facility, the UFZ Helmholtz Centre for Environmental Research GmbH (a member of the SOLUTIONS research team). This funding is from a European Union research grant. Specifically, flights, lodging, local transportation, and most meals will be paid for by SOLUTIONS funding via the UFZ Helmholtz Centre for Environmental Research GmbH. Cost to AED are estimated to be less than \$400.00.

"In cash" reimbursement (see below) will involve Dr. Burgess providing a contact person in the U.S. EPA travel office with Dr. David López Herráez' (UFZ Helmholtz Centre for Environmental Research GmbH) contact information. After the travel has occurred, Dr. Herráez will be requested by the travel office to transfer the reimbursement directly to the Agency travel account. Dr. Burgess will have already been reimbursed by the Agency's for his travel costs.

NAME Rory Conolly	DESCRIPTION A meeting of research investigators (PIs) of the Superfund Research Project at Michigan State University (MSU). Dr. Conolly collaborates with investigators at MSU on research to study mechanisms that determine the health risks of environmental pollutants. He has requested and received formal EPA management approval to participate in this activity - see the attached document "Conolly signed participation request." This collaboration between MSU and Dr. Conolly is mutually beneficial, with Dr. Conolly acquiring scientific and technical knowledge that he applies to his in-house work at EPA. The research at MSU is relevant the CSS RAP in particular and broadly relevant to all five of the ORD RAPs, and to the overall research goals of NHEERL/ISTD. Dr. Conolly will participate in research and planning discussions at the August 20 - 21, 2015 meeting. NAME Leslie Cook	DESCRIPTION The purpose of the USGBC Convergence Annual meeting is to bring together the USGBC Board of Directors, USGBC green building committee and working group members, local USGBC chapter volunteer leaders, and national partners engaged in the promotion of sustainable, energy efficient building practices and climate protection education. US EPA has a strong partnership with USGBC and a shared goal of protecting the climate through energy efficient building design, construction, and operation. ENERGY STAR tools, such as Portfolio Manager, are embedded into USGBC's Leadership in Energy and Environmental Design (LEED) certification for buildings. I will be participating in discussions and speaking on a panel to advance adoption of EPA's ENERGY STAR benchmarking, energy management, and communication strategies into USGBC's national and local outreach. NAME Stephen Edwards	DESCRIPTION The theme for this year's workshop (What Will Work? Application of New Approaches for Chemical Safety Assessment), which builds upon themes from two previous workshops, is on the recent advancements in new technologies for chemical safety assessment that have catalyzed the development of pilot applications. If sufficient scientific confidence can be established through these pilot applications, the new technologies offer considerable promise for their use to assess chemical safety. Detailed information about the workshop, including registration and logistical information, is available on our ICCA-LRI workshop web site (https://sites.google.com/site/iccalri2015/). NAME Jason Lambert	DESCRIPTION The purpose of this travel is to participate in an influential workshop associated with application of alternative methods and data in safety/risk assessment. Specifically, as a recognized expert in the field I was invited to be a panelist/speaker in one of three sessions pertaining to bridging the gap between toxicity testing in the 21st century and regulatory application. The outcome of the workshop may inform a path forward in this research area across multiple sectors (e.g., government, industry) thus is anticipated to be an exceedingly important event. Russell Thomas	the status of the establishment and operation of the network in each Member State and to discuss with the members their experiences in carrying out their roles. The regulatory relevance of an in vitro method for reproductive toxicity testing (the devTOXqP assay) submitted to EURL ECVAM for validation will also be considered, and time will be dedicated to identifying priority topics in relation to the reduction and replacement of animal testing in a regulatory context. This half-day meeting will be immediately followed by a joint one day PARERE and ESTAF meeting to provide and discuss updates on recent EURL ECVAM activities and 3Rs (Replacement, Reduction, Refinement) issues. A key item on the agenda is a mini-workshop to discuss expectations, opportunities and barriers concerning the acceptance of integrated approaches to testing and assessment (IATA). NAME Edward Washburn	DESCRIPTION During this workshop participants will establish best practices for community based observing networks (CBONs). This includes defining what CBONs are and are not, how they can be established as partnerships with observer communities, and the kinds of insights they can convey. Data standards will be discussed in the context of data acquisitions, quality assurances, protections and interoperability with other types of observatories. We will also discuss and outline how information from CBONs can be used to construct changes in the Arctic system and, as importantly, what the societal implications of these changes are. Finally, we will discuss the role(s) of CBONs in moving toward the ability to Predict Arctic Critical Events (PACE) so as to better prepare and respond to range of global and environmental change.
